

Iduapriem Commissions Ultra-Modern Recreational Facility

As part of efforts to improve employees' health and well-being, the Management of Iduapriem Mine on 9 July 2021 commissioned an ultra-modern Recreational Centre.

The multipurpose facility, which has been named after SVP – Operations, Africa Region, Jasper Musadaidzwa, has a gym, tennis court, swimming pool, hair saloon, cafeteria, and an aerobic training centre.

Speaking at the commissioning, Jasper expressed gratitude to the Mine for the honour.

He noted that while work can provide a great sense of fulfilment, it can also be a significant source of stress and may negatively impact employees' health. He, therefore, urged employees to make good use of the facility to stay healthy.

On his part, the Managing Director of Iduapriem Mine, Samuel Boakye Pobee, commended Jasper Musadaidzwa for the pivotal role he played in the establishment of the facility.

He also seized the opportunity to call on Iduapriem employees and contractors to fully utilize the facility to always maintain a healthy body and a sound mind.

"I am happy to learn that the construction of this facility forms part of our specially designed employee wellness programme aimed at promoting good health and the wellbeing of our employees, contractors and families," said Samuel. "I, therefore, encourage everyone to regularly visit this facility and exercise to stay healthy."
